## ArahWeave 7.1

### Keyboard shortcuts

#### Fabric save status

Left click on red / green square closes all windows

#### Ruler in fabric simulation

Left mouse button Moves the ruler starting point  
 Right mouse button Positions cursor on specific yarn in Thread pattern editor  
 Click on unit switches between cm/inch and threads

#### Thread pattern editor

##### Denoting in weave editor

Regulator in weave editor  
 The selected yarn blinks in the fabric simulation  
 Works inside repeat. Move fabric to bottom left

#### Move view, selection or selected object

Move up, Move down, Move left, Move right, Up one page, Move bottom left, Down one page, Move bottom right

#### Drafting in Weave editor

Left click Copy card to weave Split shaft in two  
 Right click Delete drafting  
 Middle click Copy weave to card  
 Drag down Move shaft  
 Drag right Draw straight drafting

## Weave editor

	Ctrl	Alt	Shift
1	Numeric drafting		
2	Numeric weave		
A	Select all		
B		Browse weave	
C	Crop to selection		Yarn colors on/off
D		Clear selection	Decomposed colors view
E	Weave dimensions	Extend weave	Decomposed colors warp view
F		Find repeat in selection	Decomposed colors weft view
G	Straight drafting		
H	Fix floats face and back		
I	Information on weave		
L	Float		
M	Mark long floats		
N	Remove extra warps/wefts		
O	Edit decomposed	Load weave	
P	Cross section view	Print weave	Print drafting
Q		Save weave	
S			
T	View jacquard colors		
X	Clear drafting		
Y	Guess decomposed weave layout	Redo	
Z	Replace similar	Undo	
+		Reinforce warp	
-		Reinforce weft	
(	Double weave size (or selection) in warp	Multiply x 2 in warp	
)	Double weave size (or selection) in weft	Multiply x 2 in weft	
,	Magic weave correction		
.	Dobby view on/off		
!	Regulator view on/off		
>	Optimize number of shafts		
>	Suggest shaft merge		
Space	Invert weave		
	Black weave point*	Paste part of weave	Make selection (with dragging)
	White weave point		
	Make selection (with dragging)		
	* Drawing with selection		

Left click  
Right click  
Middle click

### Control row and control column

Left click  
Right click  
Middle click

### Editing thread pattern in editor's thread pattern row or column with mouse

A warp or weft thread to draw with has to be selected in Edit thread pattern or Yarns or Edit colors window. To replace consecutive threads of same color with another color, use CTRL+click.

### Repeating a weave across all editor's area with Ctrl + left click

Ctrl      Alt      Shift

	Ctrl	Alt	Shift
Left click	Duplicate row / column	Insert black row/column	Insert empty row/column
Right click	Delete row / column	Insert negative row/column	
Middle click	Resize to row / column		

## File browsers (fabrics, images, weaves, cards)

	Alt
=	Start ordered slideshow
?	Start random slideshow
!	Write a list of files in csv format
U	
Delete	Delete
Up	Change selected file – move up
Down	Change selected file – move down
Left	Change selected file – move left
Right	Change selected file – move right
Page up	Change selected file – move one page up
Page down	Change selected file – move one page down
Home	Change selected file – move to the first file
End	Change selected file – move to last file
Enter	Load
Left click	Select
Double click	Load
Left click on the file name	Rename
	Reload
	Pressing a first letter of a directory or a file name in the browser positions selection on a directory or file starting with that letter.

## Jacquard conversion

	Ctrl	Alt
1	Load default weave – cut*	
2	Load plain weave*	Multiply weave x 2*
3	Load twill weave*	Multiply weave x 3*
4	Load broken twill weave*	Multiply weave x 4*
5	Load satin 5 weave*	Multiply weave x 5*
6	Load satin 6 weave*	Multiply weave x 6*
7	Load satin 7 weave*	Multiply weave x 7*
8	Load satin 8 weave*	Multiply weave x 8*
9	Load satin 9 weave*	Multiply weave x 9*
0	Load default weave – miss*	Multiply weave x 10*
A		Fit to window
