FAST PATTERN

With ArahPaint

WHAT IS A FAST PATTERN?

A pattern created in seconds with just a few clicks.

Special filters in ArahPaint enable you to create various patterns in seamless repeat. Design evergreen lines and dots, or create advanced patterns, similar to those drawn by hand. The patterns are rendered images in indexed colors mode, which is necessary for weaving and screen printing.

Unless otherwise stated, start with a new image size 1200 x 1200 pixels.
